CLASSROOM CORNER

Wishing everyone many blessings as we start the New Year. The weeks leading up to Christmas were a little different this year. As a school, we are usually busy with advent practice and services, our Christmas concert, and the Christmas luncheon; sadly these events were canceled. With a quick change in schedule, we had to quickly adapt to remote learning for a few days before Christmas. The middle schoolers had been busy preparing in case we had to go remote. Google classroom and emails had been set up, along with easy access to their science curriculum on McGraw-Hills ConnectED website. We had a few kinks to work out, but all in all they did a great job!

In 7th and 8th grade, the concentration in science is an Earth Science unit on Geology; with the focus on the Earth's changing surface, plate tectonics and geographical history. The 6th grade science unit is in physical science in which we are studying about matter and energy with the main focus on properties and states of matter. We learned about cohesion using drops of water on a coin, and movement of matter by observing fat molecules in milk.

In 8th grade math, it's the beginning of the first extensive unit in Algebra as they tackle solving more complex algebraic equations and graphing. For 6th grade Social Studies, we continue to learn about ancient cultures. In our study of The Israelites, we are able to make many connections to context we have learned in the bible. From the story of Abraham to King Solomon and Moses, we have made the connection to bible chapters of Genesis and Exodus.

"Be strong and courageous. Do not be terrified; do not be discouraged, for the Lord your God will be with you wherever you go." Joshua 1:9
